Title: Settlers of Catan

Project Summary

For our semester project we will be implementing the popular board game, Settlers of Catan. At the end of the semester, we would like to have a Pass-and-Play version of Settlers of Catan which supports all components of the game (trading, placing settlements, earning resources, etc.) and enforces all rules. We will be focusing on the mechanics of the game over the look and feel. As such not all mechanics may be represented in the UI at the end of the project, but they will all be implemented properly.

Project Requirements

Business Requirements:

N/A

User Requirements						
ID	Description	Actor	Topic	Priority		
US-01	As a Player, I want to start a new game with the option of 3 players and 4 players.	Player	Game Management	High		
US-02	As a Player, I want to load a previously saved game and resume playing.	Player	Game Management	Low		
US-03	As a Player, I want to set up my initial pieces at the start of the game.	Player	Setup	High		
US-04	As the Current Player, I want to be able to start my turn.	Current Player	Rolling	High		
US-05	As the Current Player, if I roll a 7 I want to be able to place the Robber and steal a card from a target Player.	Current Player, Other Player	Rolling	Low		
US-06	As a Player, if a 7 is rolled and I have 7 or more cards in my had, I need to be able to discard the proper number of cards.	Player	Rolling	Low		
US-07	As the Current Player I want to be able to trade Resource Cards with other Players	Current Player, Other Players	Trading	Med		

US-08	As the Current Player I want to be able to trade Resources with the Bank.	Current Player	Bank	Med
US-09	As the Current Player I want to be able to purchase structures.	Current Player	Purchasing	High
US-10	As the Current Player I want to be able to purchase Development Cards	Current Player	Purchasing	Med
US-11	As the Current Player I need to be able to place structures I have purchased.	Current Player	Building	High
US-12	As the Current Player I need to be able to play Development Cards I have purchased.	Current Player	Development Cards	Med

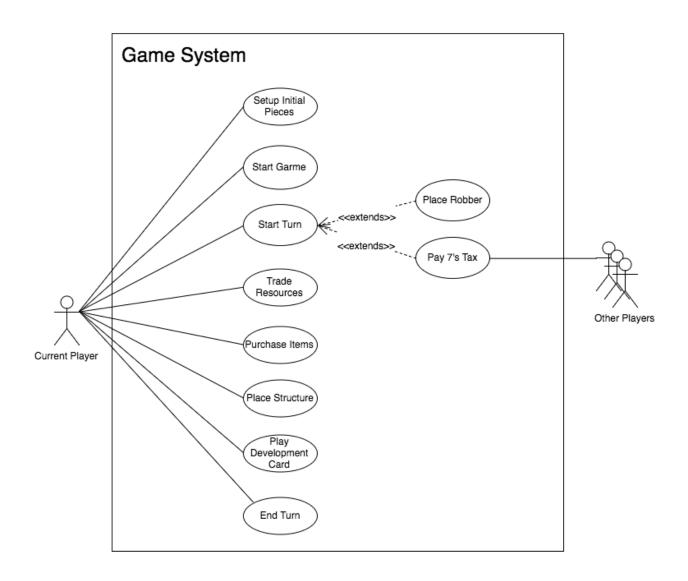

Functio	Functional Requirements						
ID	Description	Actor	Topic	Priority			
FR-01	The System will allow all Players to set up their pieces in order.	System, Players	Setup	High			
FR-02	The System will begin each turn by rolling the dice.	System	Rolling	High			
FR-03	The System will distribute the correct Resources to the correct Players based on the value of the roll.	System, Players	Resources	High			
FR-04	When a Player is selected to be robbed, the System will randomly move one Resource from the target Player's inventory to the Current Player's inventory.	System, Current Player, Other Player	Robber	Low			
FR-05	The System validates that the Current Player has the necessary Resources before any purchase is completed.	System, Current Player	Purchasing	High			
FR-06	The System validates that a selected location is legal before the Current User builds a structure on it.	System, Current Player	Building	High			
FR-07	The System does not allow the Current Player to play a Development Card in the same turn that it was purchased.	System, Current Player	Development Cards	Med			
FR-08	The System will save all game state to the database when a game is exited.	System	Game Management	Low			
FR-09	The System will reconstruct all game state when a Player loads a previously saved game.	System, Player	Game Management	Low			

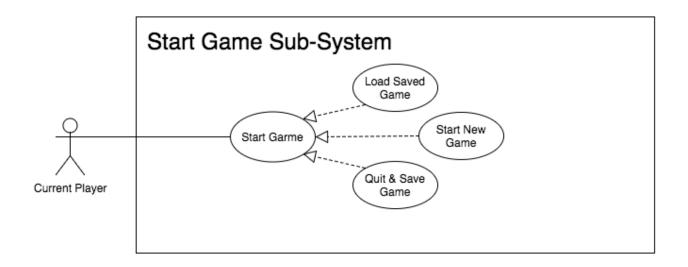

Non-Functional Requirements

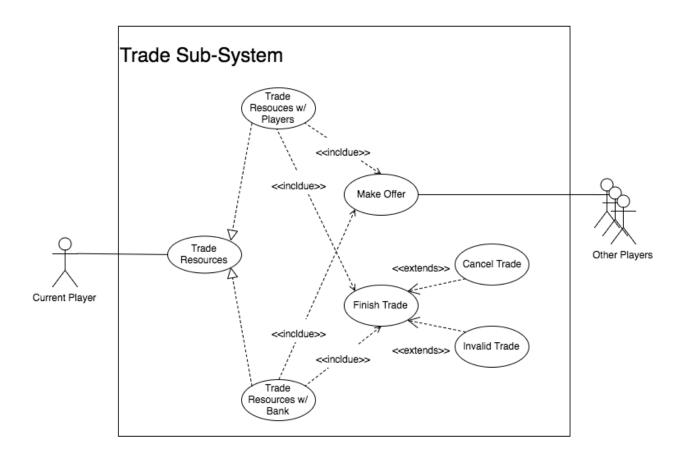

ID	Description	Actor	Topic	Priority
NFR-01	The System should run smoothly enough and quickly enough to support fun game play.	System	Performance	High
NFR-02	All game data such as Resources and Victory Points should be calculated and stored accurately.	System	Reliability	High

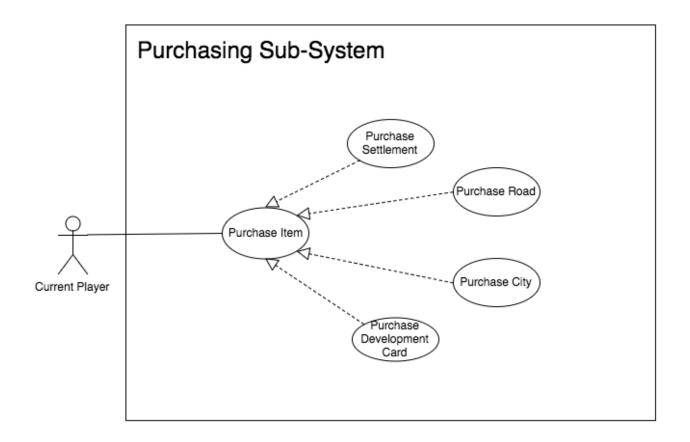

Use Cases

 - o Player (general case)
 - o Current Player
 - o Other Player 1
 - o Other Player 2
 - o Other Player 3
 - o System
- Use Case Overview

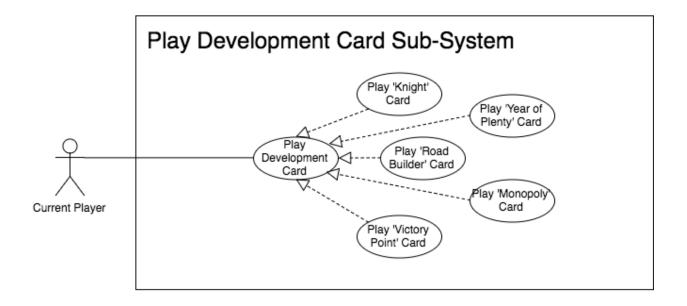

Use Case Documents

Use Case ID:	UC-01		
Use Case	Start New Game		
Name:			
Description:	Player	begins new game	
Actors:	Player		
Pre-			
conditions:			
Post-	A new game has been created and started.		
conditions:			
Frequency:	Once	per game period	
Flow of		Actor Action	System Response
Events:	1	Player selects a 3 or 4 player	System creates a new game for 3 or
		game	4 players
Variations:			
Exceptions:			
Developer			
Notes:			

Use Case ID:	UC-02
Use Case	Setup Initial Pieces
Name:	

Description:	At the beginning of the game each Player takes turns placing a Road and a Settlement until each player has two Roads and two Settlements on the Board		
Actors:	Current	Player, Other Players	
Pre- conditions:	Game ha	s begun and is in the Setup Phase	
Post-	Each Pla	yer has two Settlements and two Ro	oads on the Board
conditions:			
Frequency:	Once at	the beginning of the game	
Flow of		Actor Action	System Response
Events:	1	Player 1 selects a location for a Settlement and a Road and confirms placement	System verifies the selected location and updates the Board state
	2	Player 2 selects a location for a Settlement and a Road and confirms placement	System verifies the selected location and updates the Board state
	3	Player 3 selects a location for a Settlement and a Road and confirms placement	System verifies the selected location and updates the Board state
	4	Player 4 selects a location for two Settlements and two Roads and confirms placement	System verifies the selected locations and updates the Board state
	5	Player 3 selects a location for a Settlement and a Road and confirms placement	System verifies the selected location and updates the Board state
	6	Player 2 selects a location for a Settlement and a Road and confirms placement	System verifies the selected location and updates the Board state
	7	Player 1 selects a location for a Settlement and a Road and confirms placement	System verifies the selected location and updates the Board state
Variations:			
Exceptions:	1-7.	nvalid location selected for Settlem	ent or Road
Developer Notes:	If there are only 3 Players playing then the Flow will proceed as normal until it is Player 3's turn. Player 3 will put down both of his/her Settlements and Roads. After Player 3 is finished, then Player 2 goes, followed by Player 1.		

Use Case ID:	UC-03
Use Case	Load Saved Game
Name:	
Description:	Player loads a saved game

Actors:	Player	Player			
Pre-	There	There exists a previously saved game on the system			
conditions:					
Post-	The ga	ame is resumed.			
conditions:					
Frequency:	Once	per game period			
Flow of		Actor Action	System Response		
Events:	1	Player selects a Saved Game form the list of games on the Main Menu	System loads the Saved Game data from the database and reinitializes the game		
Variations:					
Exceptions:					
Developer		·			
Notes:					

Use Case ID:	UC-04			
Use Case	Start ⁻	Start Turn		
Name:				
Description:	Curre	nt Player officially begins turn		
Actors:	Curre	nt Player, Players		
Pre-	Previo	ous Player has ended his/her tur	n	
conditions:				
Post-	Dice a	re rolled and resources are dist	ributed, or robber is placed	
conditions:				
Frequency:	Once	per turn		
Flow of		Actor Action	System Response	
Events:	1	User clicks "Start Turn"	System rolls a 7	
		button	,	
	2	Players select Resource	System validates that the	
		Cards to discard and	appropriate number of Resource	
		confirms their selection	Cards have been discarded	
	3	Current Player picks a hex to	System validates the choice (must	
		move the Robber to	be a different tile than where the	
			Robber began)	
	4	Current Player selects a	System validates Player selection;	
		player who owns a	randomly picks a Resource Card	
		settlement on the selected	from that Player's cards and gives it	
		hex to give up a card	to the Current Player	
Variations:	The sy	ystem does not roll a 7 and distr	ibutes resources normally.	
Exceptions:
